

Uinta County Conservation District 2012 Seedling Tree Order Form

Order # _____

Seedlings are in limited supply-place your order soon!

1. This nursery stock must *not* be used in ornamental or landscaping plantings.
2. No plant purchased from the Uinta County Conservation District or their distributors may be resold as a living plant.
4. Bare root trees are available in multiples of 25 per species only.
5. Potted trees are available in multiples of 30 only (Scotch Pine and Eastern Red Cedar 50 per species)
6. Payment must accompany order. Refunds will not be given for cancelled orders after February 29, 2012
7. If trees ordered are not available, a refund will be issued, unless a substitution is requested.
8. No warranty, expressed or implied, is made by the conservation district of the seedling stock.

I have read and agree with the above "Conditions of Sale."

How did you hear about this program?

- Newspaper/magazine Friend, neighbor, etc
 Internet District newsletter
 District/WACD website other(please list)
 Agency-Conservation District, Forest Svc

Type(s) of Plantings:

- Windbreaks/Living Snow Fence Wildlife Habitat
 Erosion Control Other (please list)
 Christmas Trees Reforestation
 Visual Screen Noise Barriers

Bareroot Trees - bundles of 25 per species only
Bundles of 25: \$30.00
DECIDUOUS - 10" - 30" topheight
Conifer 5"-12" topheight

SPECIES	# of bundles	Cost/25	TOTAL
01 Caragana		\$30.00	
02 Cotoneaster		\$30.00	
03 Gambel Oak		\$30.00	
04 Chokecherry		\$30.00	
05 Lilac		\$30.00	
06 Native Plum		\$30.00	
07 Sumac		\$30.00	
08 Sand Cherry		\$30.00	
09 Nanking Cherry		\$30.00	
10 European Sage		\$30.00	
12 Buffaloberry		\$30.00	
14 Golden Currant		\$30.00	
17 Red-osier Dogwood		\$30.00	
18 N.M. Privet (Foresteria)	sold out	\$30.00	
20 Green Ash		\$30.00	
21 Siberian Elm		\$30.00	
22 Hybrid Cottonwood		\$30.00	
23 Native Willow mix		\$30.00	
24 Golden Willow		\$30.00	
25 Hackberry		\$30.00	
26 Honeylocust		\$30.00	
30 Bur Oak		\$30.00	
32 Coyote Willow		\$30.00	
34 Peachleaf Willow		\$30.00	
35 Prairie Sky Poplar		\$30.00	
104 Rocky Mtn. Juniper		\$30.00	
BAREROOT SUBTOTAL			

Regular Potted Trees - lots of 30 only
Cost per 30: \$85.00
ALL 5" - 12" topheight
2" x 2" x 7" square pots

SPECIES	# of lots	COST/30	TOTAL
200 Aspen	sold out	\$85.00	
*201 Austrian Pine		\$85.00	
*202 Colorado Blue Spruce		\$85.00	
203 Douglas Fir		\$85.00	
204 Englemann Spruce		\$85.00	
207 Pinon Pine		\$85.00	
*208 Ponderosa Pine		\$85.00	
*209 Rocky Mtn. Juniper		\$85.00	
213 Narrowleaf Cottonwood		\$85.00	
214 Limber Pine		\$85.00	
216 Coyote Willow		\$85.00	
POTTED SUBTOTAL			

SMALL POTTED TREES - lots of 30 only - \$50.00
All 3" - 5" top height
1" x 7" round tube pots 164ml

SPECIES	# of lots	COST/30	TOTAL
*300 Austrian Pine		\$50.00	
*301 Colorado Blue Spruce		\$50.00	
303 Engelmann Spruce		\$50.00	
*305 Ponderosa Pine		\$50.00	
*310 Rocky Mtn. Juniper		\$50.00	
311 Pinon Pine		\$50.00	
321 Bristlecone Pine		\$50.00	
SMALL POTTED SUBTOTAL			

SMALL POTTED TREES - lots of 50 only - \$81.00
All 3" - 5" top height
1" x 7" round tube pots 164ml

SPECIES	# of lots	COST/50	TOTAL
306 Scotch Pine	sold out	\$81.00	
*309 Eastern Redcedar		\$81.00	

****If the species you want is sold out, or if you don't see a species you are interested in , contact UCCD for other options.**

Last day to order seedlings is April 5, 2012.

Payment Must accompany order!

Make Check Payable and return to:
 Uinta County Conservation District
 P.O. Box 370
 Lyman, WY 82937

* these species also available in 1 gallon sizes, very limited supply, contact Kerri for more information

****This order form was updated on Feb 7th, 2012. Check with UCCD for the most recent information on remaining species.***

2012 Application for Seedling Trees

Seedling Trees

1. Farmstead protection requires 3 or more rows of shrubs and trees. Field protection can be obtained with 1-3 rows of shrubs and trees with proper design and protection.
2. Spacing between rows should be at least 4 feet wider than the cultivation equipment to be used, usually 12' to 16' for irrigated land and 20' for dry land.
3. Spacing in the rows varies with the species. For small to medium shrubs - 2' to 4', tall shrubs - 4' to 6', small to medium trees - 8' to 10', medium to tall trees - 10' to 14', pines and spruce - 12' to 14', and junipers - 6' to 8'. A tight row of deciduous shrubs on the windward side is desirable to trap snow in the windbreak.
4. The land should be cultivated and fallowed in the fall prior to planting the windbreak. Weed control of the planting is a must operation to maintain survival.
5. For lasting performance, better protection and greater aesthetic value, two or more rows should be evergreen species if conditions allow.

Tree Description

Although the species listed have proven adaptable to Wyoming conditions, each species may have limited adaptability to local soil types and conditions.

Shrubs

CARAGANA: Medium to tall shrub; drought resistant and tolerant of alkaline soils; good wildlife species.
COTONEASTER: Medium shrub; drought resistant; alkaline tolerant; high wildlife value
GAMBEL OAK: shrub or small tree, found on all soil types from 4,000 to 8,000 feet elevation, good habitat for mule deer and other wildlife, important plant for watershed protection
CHOCHECHERRY: Medium shrub, plant up to 8,000 feet. Preferred by a variety of wildlife species.
LILAC: Tall, one of the better shrubs for windbreak purposes, to 8,500 feet.
PLUMS: Tall shrub or short tree. Does well on moist soils (excluding alkali) up to 8,000 feet.
SUMAC: Small to medium shrub; excellent drought resistance; alkaline tolerant; plant to 8,000 feet.
SAND CHERRY: Small shrub; best on sandy to loamy soils; plant up to 7,500 feet.
NANKING CHERRY: Medium and hardy, does well on most soils statewide. Edible fruit relished by wildlife; to 7,500 feet.
EUROPEAN SAGE: Medium shrub, good alkaline tolerance, plan up to 6,000 feet.
WOODS ROSE: Low, small shrub, grows well on most soils; will not tolerate much shading. Good wildlife species.
BUFFALOBERRY: Medium to tall shrub; drought resistant and tolerant of alkaline soils; good wildlife species.
GOLDEN CURRANT: Small to medium shrub, fairly drought and alkali tolerant. Good cover for small wildlife. Plant up to 8,000 feet.
MTN MAHOGANY: tall shrub, tolerates alkaline soil. Good wildlife species
RED OSIER DOGWOOD: Small to medium sized; tolerant of flooding; tolerant of cold; plant up to 8,000 feet.
N.M. FORESTERIA (privet): Very tall, does well on moist soil up to 7,500 feet. Good wildlife cover.
WAX CURRANT: drought tolerant, occurs on dry coarse soils, height of 5 feet

Trees

COYOTE WILLOW: Medium height, requires moist soil, good wildlife value.
BUR OAK: Medium to tall tree; hardy and drought resistant; tolerant of a wide range of soils; good food value for wildlife, to 7,000 feet.
ASPEN: Tall tree, poor drought resistance, hardy in cold temperatures, plant up to 11,000 feet

COTTONWOOD HYBRID (COTTONLESS): Tall, fast growing plant in moist soils or in areas with supplemental water below 6,000 feet.

COTTONWOOD NARROWLEAF: Tall, requires moist soils or in areas with supplemental water, above 6,000 feet.

LANCELEAF COTTONWOOD: Tall, requires moist soils or in areas with supplemental water, 4500-8500' elevation

GOLDEN WILLOW: Medium to tall, plant same as cottonless cottonwood but up to 7,500 feet.

GREEN ASH: Medium to tall, on most soils, up to 8,000 feet.

PEACHLEAF WILLOW: Small to medium tree or large shrub, shade tolerant, tolerates alkaline soils.

HACKBERRY: Tall tree, grows well in most soils; to 7,500 feet.

HONEYLOCUST: Medium to tall, on most soils in the plains.

PRAIRIE SKY POPLAR: Medium to tall columnar tree, fast growing in moist soils, cold hardy up to 8,000 feet.

SIBERIAN ELM: Tall and drought resistant, on most soils stateside below 6,500 feet.

NATIVE WILLOW MIX: Mix of tall and short willows; elevation 4,500 to 9,000 feet; good for riparian areas.

Conifer Trees

AUSTRIAN PINE: Tall, on most soils of low pH up to 7,000 feet, a good windbreak tree.

COLORADO BLUE SPRUCE: Tall, on moist soils but will grow on drier sites if watered for establishment, to 9,500 feet.

DOUGLAS FIR: Tall, on east and north slopes above 6,000 feet.

EASTERN RED CEDAR: Medium, on most soils in the plains below 6,000 feet; drought resistant when established, good windbreak species.

LODGEPOLE PINE: Tall, on most soils above 6,000 feet.

PINION PINE: Medium tree, grows well and arid, droughty sites when established, to 7,500 feet.

PONDEROSA PINE: Tall, on most soils of low pH except heavy clay, up to 8,500 feet. One of the better windbreak trees.

ROCKY MT. JUNIPER: Medium tree, does well on most soils; 8,000 feet; drought resistant when established; excellent windbreak species.

WHITE FIR: Tall tree, grows best on east and north slopes; to 9,000' elevation; good Christmas tree species.

ENGELMANN SPRUCE: Tall tree; requires shade; plant only above 8,000 feet.

SCOTCH PINE: Tall, on most soils of low pH and below 7,000 feet; not advisable for windbreaks because of brittleness and not winter hardy at maturity; good Christmas tree.

LIMBER PINE: Medium tall, drought tolerant native, very strong against wind, to 11,000' elevation.

BLACK HILLS SPRUCE: Tall tree, moist well-drained soil, widely adaptable to soil type, 6,000-11,000' elevation.

BRISTLECONE PINE: Medium to tall tree, grows well on poor sites.

The Uinta County Conservation District Tree Program

The Uinta County Conservation Districts Tree Program enables farmers, ranchers and other landowners to obtain trees at nominal cost. The purpose of the program is to encourage landowners to plant effective wind barriers to protect buildings, cropland and feedlots and for erosion control, other conservation practices, reforestation, and Christmas tree plantings.

These trees cannot be resold as living trees (the roots must be severed). It is mandatory that the order form be completed in full and that all information is legible.

Plan Before You Plant

A planting plan should be prepared before trees are ordered or planted. The planting plan will show the proper location for the planting, the best species for your site, spacing between rows, spacing between trees in the row and the correct number of trees and shrubs needed. The plan will also point out requirements for proper planting to gain initial survival and how to keep trees in a vigorous growing condition.

For planting plan assistance contact the Uinta County Conservation District at 747-UCCD (8223).
