

Uinta County Conservation District

Order # _____

2014 Seedling Tree Order Form

Seedlings are in limited supply-place your order soon!

1. This nursery stock must *not* be used in ornamental or landscaping plantings.
2. No plant purchased from the Uinta County Conservation District or their distributors may be resold as a living plant.
4. Bare root trees are available in multiples of 25 per species only.
5. Tube trees are available in multiples of 30, small trays are available in lots of 50
6. Payment must accompany order. Refunds will not be given for cancelled orders.
7. If trees ordered are not available, a refund will be issued, unless a substitution is requested.
8. No warranty, expressed or implied, is made by the conservation district of the seedling stock.

I have read and agree with the above "Conditions of Sale."

Bareroot Trees - bundles of 25 per species Bundles of 25: \$30.00 DECIDUOUS - 10" - 30" topheight Conifer 5"-12" topheight			
SPECIES	# of bundles	Cost/25	TOTAL
01 Caragana	sold out	\$30.00	
02 Cotoneaster		\$30.00	
04 Chokecherry		\$30.00	
06 Native Plum		\$30.00	
07 Sumac	sold out	\$30.00	
09 Nanking Cherry	sold out	\$30.00	
12 Buffaloberry	sold out	\$30.00	
17 Red-osier Dogwood	sold out	\$30.00	
18 N.M. Privet (Foresteria)		\$30.00	
19 Wax Currant		\$30.00	
22 Hybrid Cottonwood		\$30.00	
23 Mixed Willow		\$30.00	
24 Golden Willow		\$30.00	
26 Honeylocust	sold out	\$30.00	
27 Lanceleaf Cottonwood	sold out	\$30.00	
30 Bur Oak		\$30.00	
32 Coyote Willow		\$30.00	
34 Peachleaf Willow		\$30.00	
35 Prairie Sky Poplar		\$30.00	
102 Eastern Red Cedar		\$30.00	
103 Ponderosa Pine		\$30.00	
104 Rocky Mtn. Juniper		\$30.00	
Bareroot SUBTOTAL			

Large Tube Trees - lots of 30 Cost per 30: \$85.00 ALL 5" - 12" topheight; 7"x2" tubes			
SPECIES	# of lots	COST/30	TOTAL
201 Austrian Pine	sold out	\$85.00	
202 Colorado Blue Spruce		\$85.00	
203 Douglas Fir		\$85.00	
204 Englemann Spruce		\$85.00	
207 Pinon Pine		\$85.00	
208 Ponderosa Pine		\$85.00	
209 Rocky Mtn. Juniper	sold out	\$85.00	
212 Bristlecone Pine		\$85.00	
Large Tube SUBTOTAL			

Small Tube Trees - lots of 30 \$65.00 All 3" - 6" top height; 8"x1.5" tubes			
SPECIES	# of lots	COST/30	TOTAL
300 Austrian Pine	sold out	\$65.00	
302 Douglas Fir		\$65.00	
303 Englemann Spruce		\$65.00	
304 Lodgepole Pine		\$65.00	
305 Ponderosa Pine		\$65.00	
307 White Fir		\$65.00	
310 Rocky Mtn. Juniper	sold out	\$65.00	
311 Pinon Pine		\$65.00	
321 Bristlecone Pine		\$65.00	
Small Tube SUBTOTAL			

Large Cell Styrofoam-lots of 30/species \$85.00 Individual tube size-8" x 2"			
SPECIES	# of lots	COST/30	TOTAL
200 Aspen		\$85.00	
213 Narrowleaf Cttnwtd		\$85.00	
216 Coyote Willow	sold out	\$85.00	
218 Fremont Cttnwtd	sold out	\$85.00	
Styrofoam SUBTOTAL			

Small Tray Trees-lots of 50 \$90.00 (last year for the trays of 50) All 3" - 6" top height; 6"x2" tubes			
SPECIES	# of lots	COST/50	TOTAL
600 Austrian Pine	sold out	\$90.00	
601 Colorado Blue Spruce		\$90.00	
602 Douglas Fir		\$90.00	
603 Englemann Spruce		\$90.00	
604 Lodgepole Pine		\$90.00	
607 White Fir		\$90.00	
609 Eastern Red Cedar		\$90.00	
610 Rocky Mtn. Juniper	sold out	\$90.00	
611 Pinon Pine		\$90.00	
621 Bristlecone Pine		\$90.00	
Small Tray SUBTOTAL			

Extra Large Potted Sold in multiples of 4 18" - 24" top height. #1 (approx 1 gal) container			
SPECIES	# of units	COST/4	TOTAL
400 Austrian Pine	sold out	\$40.00	
401 Colorado Blue Spruce	sold out	\$40.00	
402 Eastern Red Cedar	sold out	\$40.00	
408 Ponderosa Pine	sold out	\$40.00	
410 Rocky Mtn. Juniper		\$40.00	
XL Potted SUBTOTAL			

Payment Must accompany order!

Last day to order seedlings: Wednesday, April 16th, 2014

2014 Application for Seedling Trees

Seedling Trees

1. Farmstead protection requires 3 or more rows of shrubs and trees. Field protection can be obtained with 1-3 rows of shrubs and trees with proper design and protection.
2. Spacing between rows should be at least 4 feet wider than the cultivation equipment to be used, usually 12' to 16' for irrigated land and 20' for dry land.
3. Spacing in the rows varies with the species. For small to medium shrubs - 2' to 4', tall shrubs - 4' to 6', small to medium trees - 8' to 10', medium to tall trees - 10' to 14', pines and spruce - 12' to 14', and junipers - 6' to 8'. A tight row of deciduous shrubs on the windward side is desirable to trap snow in the windbreak.
4. The land should be cultivated and fallowed in the fall prior to planting the windbreak. Weed control of the planting is a must operation to maintain survival.
5. For lasting performance, better protection and greater aesthetic value, two or more rows should be evergreen species if conditions allow.

Tree Description

Although the species listed have proven adaptable to Wyoming conditions, each species may have limited adaptability to local soil types and conditions. For more information on species suitability please visit <http://csfs.colostate.edu/pdfs/08byrgd-www.pdf>.

Shrubs

CARAGANA: Medium to tall shrub; drought resistant and tolerant of alkaline soils; good wildlife species.
COTONEASTER: Medium shrub; drought resistant; alkaline tolerant; high wildlife value
GAMBEL OAK: shrub or small tree, found on all soil types from 4,000 to 8,000 feet elevation, good habitat for mule deer and other wildlife, important plant for watershed protection
CHOKECHERRY: Medium shrub, plant up to 8,000 feet. Preferred by a variety of wildlife species.
LILAC: Tall, one of the better shrubs for windbreak purposes, to 8,500 feet.
PLUMS: Tall shrub or short tree. Does well on moist soils (excluding alkali) up to 8,000 feet.
SUMAC: Small to medium shrub; excellent drought resistance; alkaline tolerant; plant to 8,000 feet.
SAND CHERRY: Small shrub; best on sandy to loamy soils; plant up to 7,500 feet.
NANKING CHERRY: Medium and hardy, does well on most soils statewide. Edible fruit relished by wildlife; to 7,500 feet.
EUROPEAN SAGE: Medium shrub, good alkaline tolerance, plant up to 6,000 feet.
WOODS ROSE: Low, small shrub, grows well on most soils; will not tolerate much shading. Good wildlife species.
BUFFALOBERRY: Medium to tall shrub; drought resistant and tolerant of alkaline soils; good wildlife species.
GOLDEN CURRANT: Small to medium shrub, fairly drought and alkali tolerant. Good cover for small wildlife. Plant up to 8,000 feet.
MTN MAHOGANY: tall shrub, tolerates alkaline soil. Good wildlife species
RED OSIER DOGWOOD: Small to medium sized; tolerant of flooding; tolerant of cold; plant up to 8,000 feet.
N.M. FORESTERIA (privet): Very tall, does well on moist soil up to 7,500 feet. Good wildlife cover.
WAX CURRANT: drought tolerant, occurs on dry coarse soils, height of 5 feet

Trees

COYOTE WILLOW: Medium height, requires moist soil, good wildlife value.
BUR OAK: Medium to tall tree; hardy and drought resistant; tolerant of a wide range of soils; good food value for wildlife, to 7,000 feet.
ASPEN: Tall tree, poor drought resistance, hardy in cold temperatures, plant up to 11,000 feet

COTTONWOOD HYBRID (COTTONLESS): Tall, fast growing plant in moist soils or in areas with supplemental water below 6,000 feet.

COTTONWOOD NARROWLEAF: Tall, requires moist soils or in areas with supplemental water, above 6,000 feet.

LANCELEAF COTTONWOOD: Tall, requires moist soils or in areas with supplemental water, 4500-8500' elevation

GOLDEN WILLOW: Medium to tall, plant same as cottonless cottonwood but up to 7,500 feet.

GREEN ASH: Medium to tall, on most soils, up to 8,000 feet.

PEACHLEAF WILLOW: Small to medium tree or large shrub, shade tolerant, tolerates alkaline soils.

HACKBERRY: Tall tree, grows well in most soils; to 7,500 feet.

HONEYLOCUST: Medium to tall, on most soils in the plains.

PRAIRIE SKY POPLAR: Medium to tall columnar tree, fast growing in moist soils, cold hardy up to 8,000 feet.

SIBERIAN ELM: Tall and drought resistant, on most soils stateside below 6,500 feet.

NATIVE WILLOW MIX: Mix of tall and short willows; elevation 4,500 to 9,000 feet; good for riparian areas.

Conifer Trees

AUSTRIAN PINE: Tall, on most soils of low pH up to 7,000 feet, a good windbreak tree.

COLORADO BLUE SPRUCE: Tall, on moist soils but will grow on drier sites if watered for establishment, to 9,500 feet.

DOUGLAS FIR: Tall, on east and north slopes above 6,000 feet.

EASTERN RED CEDAR: Medium, on most soils in the plains below 6,000 feet; drought resistant when established, good windbreak species.

LOGPOLE PINE: Tall, on most soils above 6,000 feet.

PINION PINE: Medium tree, grows well and arid, droughty sites when established, to 7,500 feet.

PONDEROSA PINE: Tall, on most soils of low pH except heavy clay, up to 8,500 feet. One of the better windbreak trees.

ROCKY MT. JUNIPER: Medium tree, does well on most soils; 8,000 feet; drought resistant when established; excellent windbreak species.

WHITE FIR: Tall tree, grows best on east and north slopes; to 9,000' elevation; good Christmas tree species.

ENGELMANN SPRUCE: Tall tree; requires shade; plant only above 8,000 feet.

SCOTCH PINE: Tall, on most soils of low pH and below 7,000 feet; not advisable for windbreaks because of brittleness and not winter hardy at maturity; good Christmas tree.

LIMBER PINE: Medium tall, drought tolerant native, very strong against wind, to 11,000' elevation.

BLACK HILLS SPRUCE: Tall tree, moist well-drained soil, widely adaptable to soil type, 6,000-11,000' elevation.

BRISTLECONE PINE: Medium to tall tree, grows well on poor sites.

The Uinta County Conservation District Tree Program

The Uinta County Conservation Districts Tree Program enables farmers, ranchers and other landowners to obtain trees at nominal cost. The purpose of the program is to encourage landowners to plant effective wind barriers to protect buildings, cropland and feedlots and for erosion control, other conservation practices, reforestation, and Christmas tree plantings.

These trees cannot be resold as living trees (the roots must be severed). It is mandatory that the order form be completed in full and that all information is legible.

Plan Before You Plant

A planting plan should be prepared before trees are ordered or planted. The planting plan will show the proper location for the planting, the best species for your site, spacing between rows, spacing between trees in the row and the correct number of trees and shrubs needed. The plan will also point out requirements for proper planting to gain initial survival and how to keep trees in a vigorous growing condition.

For planting plan assistance contact the Uinta County Conservation District at 787-3070.
