Important Planting Information

The Uinta County Conservation Districts Tree Program enables landowners to obtain trees at nominal cost. The purpose of the program is to encourage landowners to plant effective wind barriers to protect buildings, cropland and feedlots and for erosion control, streambank stabilization, reforestation, and other conservation plantings. These trees cannot be resold as living trees (the roots must be severed). The order form must be completed in full and all information be legible. Payment must be received before seedlings are ordered.

Plan Before You Plant

A planting plan should be prepared before trees are ordered or planted. The planting plan will show the proper location for the planting, the best species for your site, spacing between rows, spacing between trees in the row and the correct number of trees and shrubs needed. The plan will also point out requirements for proper planting to gain initial survival and how to keep trees in a vigorous growing condition. For planting plan assistance contact the Uinta County Conservation District at 307-787-3070, ksabey.uccd@gmail.com, or visit www.uintacountycd.com.

Land Preparation and Spacing

The land should be cultivated and fallowed in the fall prior to planting. Weed control of the planting is very important to maintain tree survival. Effective windbreaks and living snow fences can be obtained with 1-3 rows of shrubs and trees with proper design and installation.

Drip Irrigation Systems for Supplemental Water <u>Protect Your Investment</u>

Supplemental water will be necessary for at least 3-5 years while plants establish. Installing a drip irrigation system is a highly recommended moisture conservation technique to help ensure optimum plant growth and deep root establishment. Some of the benefits of using a drip irrigation system include; only a small area of soil near the plant is wetted, very little water is lost to evaporation. Most importantly, plants aren't stressed by the too-wet, toodry cycle of other methods.

Seedling Tree Nurseries

Seedling this year are provided by 3 different nurseries, Lincoln
Oakes Nursery, CSFS Nursery and OneCanopy. Our hope is
to be able to provide the seedlings needed to meet the needs
of our constituents. If there is a species you would like, but
don't see it on the order form, please call UCCD. You are still
encouraged to order early as species sell out quickly.

Seedling Descriptions & Pictures

	For descriptions and pictures of each seedling species listed on
า	this order form, please visit our website at
ı	www.uintacountycd.com under programs/seedling trees.
